

# COMPANY PROFILE

## INTRODUCTION

SPATRIX CONSULTING ARCHITECTS & ENGINEERS PLC is an independent professional firm specializing in innovative Planning, Design and Management of projects in the construction industry. It was established by the name of 'aklilarchitects' in 2009 and renamed as SPATRIX CONSULTING ARCHITECTS & ENGINEERS in 2015.

The firm works in teams with different professionals of high experience and integrity. They all bring along more than 10 years of Design experience on a wide range of projects that will be an invaluable resource in design and development of a wide range of projects.

SPATRIX CONSULTING ARCHITECTS & ENGINEERS PLC provides a comprehensive design and project Management service of excellence.

### AIMS

- To identify, assess and be actively involved in projects which best utilizes the maximum range of skills within the firm to ensure a quality product, client satisfaction, environment responsibility, satisfactory financial returns, stability and development of personal and collective skills.
- To understand the client's requirements and the social, economic and cultural environment in which those requirements were generated.
- To develop a liaison between our client and his contractors in which the opinions and skills of both can contribute towards the success of the project.

- To produce appropriate and refined architecture and design which complements the cultural and social tradition of the country in which it is located.
- To ensure by efficient management and co-ordination, that the financial resources of the client are used in the most efficient way and that financial and time objectives are maintained throughout the project.
- To strive for excellence in design and ethical standards.

## SERVICES

The firm specializes in the planning, design and management of Architectural, Structural, Sanitary, Mechanical and Electrical design projects in the following areas: Commercial, offices, Hotels, Restaurants, shopping centers, banks, sports/health centers, education/training centers, medical/hospitals services, airports/travel facilities, housing, factories/industries projects, and graphics.

The firm together with its skilled team of Architects, Engineers, support staff and specialist consultants are able to offer comprehensive design services from the initial feasibility study through to the completed contract on all the mentioned areas of work. These range from a small extension for an individual household to large and complex commercial and residential developments. Alternatively, the scope of the services may be tailored to suite a client's specific needs. The practice is able to offer architectural design and building consultation as an extension of a client's in-house skills and resources for both new and existing buildings.
